

Orange County Wildlife Rehabilitation Centers

When you find a young bird that you think is abandoned, be certain that it is truly orphaned before removing it from the area. Young birds are often out of their nests a few days before they can fly, being cared for by parents that are nearby, but possibly not visible. The adult birds can do a much better job of raising their young than can humans. You can help the parents by keeping dogs and cats out of the area.

City	Organization/website	Contact	Phone/email	Specialties
Costa Mesa	All Creatures Care Cottage		949-642-7151	all wildlife
